

## BlueCamroo Release Notes 2.3.1

November 24, 2010

### Welcome

These release notes provide a detailed overview of several enhancements since our October release.

If you have any comments on these changes or wish to suggest a future change, please [visit our forums](#).

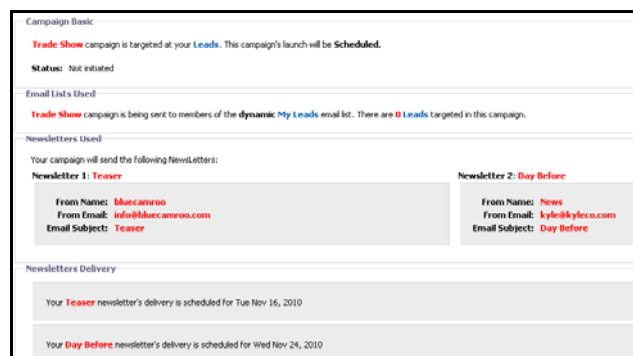

### What's New in BlueCamroo?

November's update offers a variety of general improvements. Two changes of greater significance are 1) updates to the **Campaign Manager**, and 2) the addition of a customer-requested **Sales Opportunity Tracking** pre-defined report. Another addition of note is the ability to create autoscheduling relationships between stages and tasks in a project template.

Continue reading below for more details regarding these changes.

### Campaign Manager

#### Campaign Summary

Campaign Basic:  
Trade Show campaign is targeted at your Leads. This campaign's launch will be Scheduled.  
Status: Not initiated

Email Lists Used:  
Trade Show campaign is being sent to members of the dynamic My Leads email list. There are 0 Leads targeted in this campaign.

Newsletters Used:  
Your campaign will send the following Newsletters:

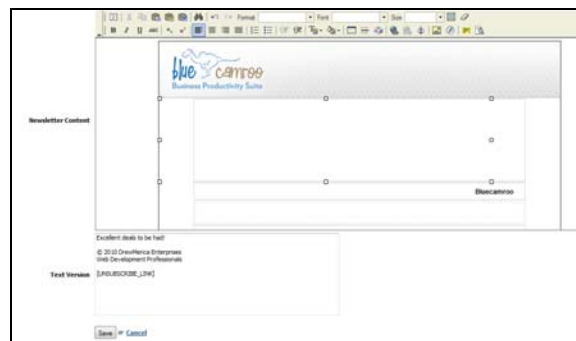

Newsletter 1: Teaser	Newsletter 2: Day Before
From Name: bluecamroo From Email: info@bluecamroo.com Email Subject: Teaser	From Name: News From Email: kyle@kyleco.com Email Subject: Day Before

Newsletters Delivery:  
Your Teaser newsletter's delivery is scheduled for Tue Nov 16, 2010  
Your Day Before newsletter's delivery is scheduled for Wed Nov 24, 2010

A campaign's **Campaign Details** page now has a more natural language breakdown of campaign details, email list used, newsletters used, and scheduling.

Also, as you progress through the campaign creation stages, you will see a summary in the **Right** pane.

#### Text and HTML Newsletters

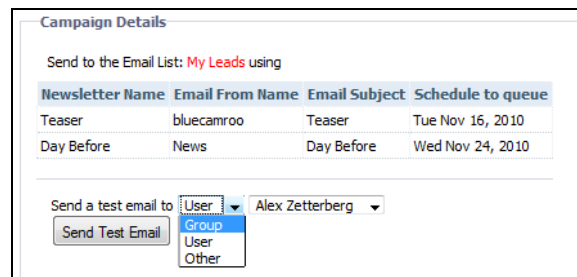

In **Campaign Manager's** newsletter composition page, we've added a Text Version field. You can enter an alternate version that is compatible with text-only email systems. Do not use HTML tags but you can still use BlueCamroo placeholders (e.g., [FIRST\_NAME]). If you complete both, the text-only version will be used for recipients who have set up their email system to display email as text only.

#### 'View in Browser' Tag

The newsletter now supports a tag that lets the newsletter recipient view the newsletter in their default browser. Nest clickable text between the [BROWSER\_VERSION\_BEGIN] and [BROWSER\_VERSION\_END] tags. For example:

[BROWSER\_VERSION\_BEGIN]Click here to view in your browser [BROWSER\_VERSION\_END].

#### Test Email

Campaign Details

Send to the Email List: My Leads using

Newsletter Name	Email From Name	Email Subject	Schedule to queue
Teaser	bluecamroo	Teaser	Tue Nov 16, 2010
Day Before	News	Day Before	Wed Nov 24, 2010

Send a test email to: User (Alex Zetterberg)

Buttons: Send Test Email, User, Group, User, Other

Previously, you could only send test emails one-at-a-time to individual email addresses. You can now send a test email to a group, a specific BlueCamroo user, or any specified email (for example to test how your newsletters appear in gmail, hotmail, etc.).

### Copy between Lead and Contact Campaigns

Previously, it was not possible to copy campaigns for Leads to create a Contact campaign, or vice versa. This is now enabled to make it quick and easy to send campaigns to both categories of contact.

### Campaign 'Stop' Trigger

BlueCamroo has always given you the ability to embed a Trigger link in a Campaign Newsletter from which the recipient can opt in to a new series of newsletters. A small but useful tweak for advanced campaign setup is that the same triggers can now stop the original campaign, allowing you to build more sophisticated branching campaigns.

### Auto-Inlining CSS Styles

With so many email systems implementing patchy (at best!) support for CSS (Cascading Style Sheets), experienced email newsletter designers and authors have long been used to repeating Style declarations 'in-line' on every HTML element, such as every <p> paragraph tag.

BlueCamroo now does the hard work for you. Simply define a <style> section in your email template as you would for a web page – or ask your web designer for help – and BlueCamroo will automatically insert the correct styles element-by-element when your email is sent.

Auto-Inlining helps to ensure more of your audience sees your emails the way you intended them!

## Reply Tweet with Social Network Scout

If you reply to a tweet via Social Network Scout and the person you're replying to is a lead, contact, or account, both the original and your reply tweet will then be copied to the **Social Network Messages** section on the lead/contact/account's **Messages** page.

## Reports

### New Pre-Defined Sales Opportunity Tracking Report

Stage	# Opportunities			Opportunity Weighted Value			Opportunity Values		
	Start	Change	End	Start	Change	End	Start	Change	End
Prospecting	3	2	5	17,725.00	1,500.00	19,225.00	20,250.00	15,000.00	35,250.00
Qualification	3	0	3	1,260.00	0.00	1,260.00	12,600.00	0.00	12,600.00
Analyzing	2	0	2	1,106.25	0.00	1,106.25	7,375.00	0.00	7,375.00
Proposal Quotation	4	1	5	2,250.00	1,175.00	3,425.00	4,500.00	2,350.00	6,850.00
Negotiation/Review	0	0	0	0.00	0.00	0.00	0.00	0.00	0.00
<b>Total Pipeline Value</b>	<b>12</b>	<b>3</b>	<b>15</b>	<b>22,341.25</b>	<b>2,675.00</b>	<b>25,016.25</b>	<b>44,725.00</b>	<b>17,350.00</b>	<b>62,075.00</b>
Won - Estimated Value			5						6,625.00
Won - Actual Value									6,956.25
Other Sales									21,446.25
<b>Total Sales (Actual)</b>									<b>28,402.90</b>

We've added a **Sales Opportunity Tracking** report. You can find it under the report's **Pre-Defined** tab. The **Sales Opportunity Tracking** report allows you to view all opportunities and their total weighted/non weighted value over a given date range.

### New 'Funnel' Chart Type

We've added a Funnel chart to your list of Reports chart types (e.g., pie chart, line chart, etc.). The Funnel chart can be used to represent a series of stages leading to a goal or outcome.

## 'Autoschedule Only' dependencies in Project Templates

We've heard from a number of users that they have tried creating dependencies in Project Templates in order to take advantage of the auto-scheduling capability that runs when a Project is built from a Template, but have then found the dependencies an obstacle in actually managing their projects.

To facilitate having BlueCamroo automatically populate stage/task start dates upon project creation via a template, you can now enter a dependency and check it as **Autoscheduling Only**. Autoscheduling-Only dependencies will be used by BlueCamroo to auto-schedule your project dates in line with the sequence (and any lag times) you define, but will not create actual dependencies in the project you build.

## Expense Sheets

Expense sheets can now be exported as PDFs.

## InBox: Mark Messages as Read

Your main messaging page, the **Inbox** page (available from your **Left Pane Toolbar** when on the **Home** tab) now has a way to quickly dismiss Internal Messages without reading them. Simply click the checkbox next to the Message and click the newly added **Mark as Read** button.

### Email Save/Autosave Drafts

If you need to break off in the middle of writing an email (including editing various template emails), BlueCamroo now enables you to save a draft and come back to it later. Additionally, BlueCamroo now autosaves every five minutes.

Draft emails are stored in your Inbox (available from the **Left Pane Toolbar**).

### Auto-Inlining CSS Styles

The auto-inlining styles capability introduced this month for Campaign Email is also added to standard emails.

You can best take advantage of this by adding a `<style>` section to your **General Email Template**, that will ensure all emails from your business follow your preferred look.

(Your General Email Template is edited from **Setup | Company Setup | Automation | Email / Message Template**)
